InVivo Therapeutics Announces Reverse Stock Split

February 3, 2020

CAMBRIDGE, Mass. (February 3, 2020) – InVivo Therapeutics Holdings Corp. (Nasdaq: NVIV) today announced a 1-for-30 reverse stock split of its common stock and a proportionate reduction in its authorized common stock. The company anticipates the reverse stock split will become effective at 5:00 p.m. Eastern Time on February 11, 2020, and shares of InVivo Therapeutics common stock will trade on a post-split basis under the Company's existing trading symbol, "NVIV," at the market open on February 12, 2020. The new CUSIP number for the Company's common stock following the reverse stock split will be CUSIP 46186M 506/ISIN US46186M5067.

At the effective time of the reverse stock split, every 30 shares of InVivo Therapeutics common stock will be combined into 1 share of InVivo Therapeutics common stock. In connection with the reverse stock split, the authorized shares will be reduced from 500 million shares to approximately 16.7 million shares. The reverse stock split is anticipated to reduce the company's issued and outstanding shares of common stock from approximately 17.8 million to approximately 0.6 million. Fractional shares resulting from the reverse stock split will be rounded up to the nearest whole share, and all shares of common stock (including fractions thereof) issuable upon the reverse stock split to a given stockholder shall be aggregated for the purpose of determining whether the reverse stock split would result in the issuance of a fractional share. In addition, proportionate adjustments will be made to the exercise prices of the company's outstanding stock options and warrants and to the number of shares issued and issuable under the company's existing stock incentive plans.

The implementation of the reverse stock split is intended to increase the per share trading price of the Company's common stock to fulfill the \$1.00 minimum bid price requirement for continued listing on the Nasdaq Capital Market.

About InVivo Therapeutics

InVivo Therapeutics Holdings Corp. is a research and clinical-stage biomaterials and biotechnology company with a focus on treatment of spinal cord injuries. The company was founded in 2005 with proprietary technology co-invented by Robert Langer, Sc.D., Professor at Massachusetts Institute of Technology, and Joseph P. Vacanti, M.D., who then was at Boston Children's Hospital and who now is affiliated with Massachusetts General Hospital. The publicly traded company is headquartered in Cambridge, MA.
